

LVGL official provided examples

Refer to <https://docs.lvgl.io/master/examples.html>

Result from LVGL	Result from EVE simulator (BT816 with 320x240 LCD)
Get started	
A very simple <i>hello world</i> label	lv_example_get_started_1()
	
	Supported
A button with a label and react on click event	lv_example_get_started_2()
	
	Supported
Create styles from scratch for buttons	lv_example_get_started_3()
	
	Supported
Create a slider and write its value on a label	lv_example_get_started_4()

	
Supported	
Style	
Size style	lv_example_style_1()
	
Supported	
Background styles	
lv_example_style_2()	
	
Supported	
Border styles	
lv_example_style_3()	

	
supported	
Outline styles	lv_example_style_4()
	
supported	
Shadow styles	lv_example_style_5()
	
supported	
Image styles	lv_example_style_6()

	
	Partly supported, no image rotation with outline
Arc styles	lv_example_style_7()
	
	Supported
Text styles	lv_example_style_8()
	
	Supported
Line styles	lv_example_style_9()

	
supported	
Transition	lv_example_style_10()
	
supported	
Using multiple styles	lv_example_style_11()

	
	Supported. The shadow may not be visible because the shadow color is not set in the example.
Local styles	lv_example_style_12()
	
	Supported
Add styles to parts and states	lv_example_style_13()
	
	Partly supported, no border radius, colour mistake
Extending the current theme	lv_example_style_14()

	
	Supported
Opacity and Transformations	lv_example_style_15()
	
	Partly supported, no rotation, size change
Animations	
Start animation on an event	lv_example_anim_1()
	
	Supported
Playback animation	lv_example_anim_2()

			
		Supported	
Cubic Bezier animation		lv_example_anim_3()	
			
		Supported	
Animation timeline		lv_example_anim_timeline_1()	
			
		Supported	
Events			
Button click event		lv_example_event_1()	

	
	Supported
Handle multiple events	lv_example_event_2()
The last button event: LV_EVENT_CLICKED 	The last button event: LV_EVENT_CLICKED 
	Supported
Event bubbling	lv_example_event_3()
	
	Supported
Draw event	lv_example_event_4()

	
	Supported
Layouts	
Flex	
A simple row and a column layout with flexbox	lv_example_flex_1()
	
	Supported
Arrange items in rows with wrap and even spacing	lv_example_flex_2()
	
	Supported
Demonstrate flex grow	lv_example_flex_3()

	
	Supported
Demonstrate flex grow.	lv_example_flex_4()
	
	Supported
Demonstrate column and row gap style properties	lv_example_flex_5()
	
	Supported
RTL base direction changes order of the items	lv_example_flex_6()

	
	Supported
Grid	
A simple grid	lv_example_grid_1()
	
	Supported
Demonstrate cell placement and span	lv_example_grid_2()
	
	Supported
Demonstrate grid's -free unit-	lv_example_grid_3()

	
	Supported
Demonstrate track placement	lv_example_grid_4()
	
	Supported
Demonstrate column and row gap	lv_example_grid_5()
	
	Supported
Demonstrate RTL direction on grid	lv_example_grid_6()

	
	Supported
Scrolling	
Nested scrolling	lv_example_scroll_1()
	
	Supported
Snapping	lv_example_scroll_2()
	
	Supported
Floating button	lv_example_scroll_3()

	
	Supported
Styling the scrollbars	lv_example_scroll_4()
	
	Supported
Right to left scrolling	lv_example_scroll_5()
	
	Not tested
Translate on scroll	lv_example_scroll_6()

	
	Not supported
Widgets	
Base object	
Base objects with custom styles	lv_example_obj_1()
	
	Supported
Make an object draggable	lv_example_obj_2()
	
	Supported
Arc	
Simple Arc	lv_example_arc_1()

	
	Supported
Loader with Arc	lv_example_arc_2()
	
	Supported
Bar	
Simple Bar	lv_example_bar_1()
	
	Supported
Styling a bar	lv_example_bar_2()

	
	Supported
Temperature meter	lv_example_bar_3()
	
	Not supported
Stripe pattern and range value	lv_example_bar_4()
	
	Not supported
Bar with LTR and RTL base direction	lv_example_bar_5()

Left to Right base direction  Right to Left base direction 	Left to Right base direction  Right to Left base direction 
	Supported
Custom drawer to show the current value	lv_example_bar_6()
	
	Supported
Bar with opposite direction	lv_example_bar_7()
	
	Supported
Calendar	
Calendar with header	lv_example_calendar_1()

	
	Partly supported, display list will overflow when change date, and disable some display effect such as border will disable some functions on calendar
Canvas	
Drawing on the Canvas and rotate	lv_example_canvas_1()
	
	Not supported
Transparent Canvas with chroma keying	lv_example_canvas_2()
	
	Supported
Draw a rectangle to the canvas	lv_example_canvas_3()

	
	Not supported
Draw a label to the canvas	lv_example_canvas_4()
	
	Not supported
Draw an arc to the canvas	lv_example_canvas_5()
	
	Not supported
Draw an image to the canvas	lv_example_canvas_6()

	
	Assume not supported, since no action on official website
Draw a line to the canvas	lv_example_canvas_7()
	
	Not supported
Draw a vector graphic to the canvas	lv_example_canvas_8()
	
	Not supported
Chart	
Line Chart	lv_example_chart_1()

	
	Supported
Axis ticks and labels with scrolling	lv_example_chart_2()
	
	Supported
Show the value of the pressed points	lv_example_chart_3()
	
	Supported
Recolor bars based on their value	lv_example_chart_4()

		
		Not tested
Faded area line chart with custom division lines		lv_example_chart_5()
		
		Not tested
Show cursor on the clicked point		lv_example_chart_6()
Click on a point 		Click on a point 
		Supported
Scatter chart		lv_example_chart_7()

			
		Supported	
Checkbox			
Simple Checkboxes		lv_example_checkbox_1()	
			
		Supported	
Checkboxes as radio buttons		lv_example_checkbox_2()	
			
		Supported	
Dropdown			
Simple Drop down list		lv_example_dropdown_1()	

	
	Supported
Drop down in four directions	lv_example_dropdown_2()
	
	Supported
Menu	lv_example_dropdown_3()
	
	Supported
Image	
Image button	lv_example_imagebutton_1()

	
	Not supported
Keyboard	
Keyboard with text area	lv_example_keyboard_1()
	
	Supported
Keyboard with custom map	lv_example_keyboard_2()
	
	Support
Label	
Line wrap, recoloring and scrolling	lv_example_label_1()

Recolor is not supported for v9 now. cularly scrolling text.	Recolor is not supported for v9 now. It is a circularly scr
	Supported
Text shadow	lv_example_label_2()
A simple method to create shadows on a text. It even works with newlines and spaces.	A simple method to create shadows on a text. It even works with newlines and spaces.
	Supported
Show LTR, RTL and Chinese texts	lv_example_label_3()
In modern terminology, a microcontroller is similar to a system on a chip (SoC). מעבד, או בשמו המלא יחידת עיבוד מרכזית (באנגלית: CPU - Central Processing Unit). 嵌入式系统（Embedded System）， 是一种嵌入机械或电气系统内部、具有专一功能和实时计算性能的计算机系统。	In modern terminology, a microcontroller is similar to a system on a chip (SoC). מעבד, או בשמו המלא יחידת עיבוד מרכזית (באנגלית: CPU - Central Processing Unit). 嵌入式系统（Embedded System）， 是一种嵌入机械或电气系统内部、具有专一功能和实时计算性能的计算机系统。
	Supported
Draw label with gradient color	lv_example_label_4()

 Text with gradient	
	Not supported
Customize circular scrolling animation	lv_example_label_5()
 It is a circularly scroll	 It is a circularly scroll
	Supported
LED	
LED with custom style	lv_example_led_1()
 Three colored circles (dark blue, red, light blue) representing LEDs.	 Three colored circles (dark blue, red, light blue) representing LEDs.
	Supported
Line	
Simple Line	lv_example_line_1()

	
	Supported
List	
Simple List	lv_example_list_1()
	
	Supported
Sorting a List using up and down buttons	lv_example_list_2()
	
	Supported
Menu	
Simple Menu	lv_example_menu_1()

Item 1 Item 2 Item 3 (Click me!)	Item 1 Item 2 Item 3 (Click me!)
	Supported
Simple Menu with root btn	lv_example_menu_2()
< Item 1 Item 2 Item 3 (Click me!)	< Item 1 Item 2 Item 3 (Click me!)
	Supported
Simple Menu with custom header	lv_example_menu_3()
Item 1 (Click me!) Item 2 (Click me!) Item 3 (Click me!)	Item 1 (Click me!) Item 2 (Click me!) Item 3 (Click me!)
	Supported
Simple Menu with floating btn to add new menu page	lv_example_menu_4()

Item 1 Item 2	Item 1 Item 2
	
	Supported
Complex Menu	lv_example_menu_5()
	
	Supported
Message box	
Simple Message box	lv_example_msgbox_1()
	
	Supported
Roller	
Simple Roller	lv_example_roller_1()

	
	Supported
Styling the roller	lv_example_roller_2()
	
	Supported
add fade mask to roller	lv_example_roller_3()
	
	Not supported
Scale	
	lv_example_scale_1()

	
	Supported
	lv_example_scale_2()
	
	Supported
	lv_example_scale_3()
	
	Partly supported, second pointer has issue
	lv_example_scale_4()
	
	Supported

	lv_example_scale_5()
	
	Supported
Slider	
Simple Slider	lv_example_slider_1()
	
	Supported
Slider with custom style	lv_example_slider_2()
	
	Supported
Slider with extended drawer	lv_example_slider_3()

	
	Supported
Slider with opposite direction	lv_example_slider_4()
	
	Supported
Span	
Span with custom styles	lv_example_span_1()
	
	Supported
Spinbox	
Simple Spinbox	lv_example_spinbox_1()

	
Supported	
Spinner	
Simple spinner	lv_example_spinner_1()
	
Supported	
Switch	
Simple Switch	lv_example_switch_1()
	
Supported	
Table	
Simple table	lv_example_table_1()

	
	Partly supported, missing separate lines
Lightweight list from table	lv_example_table_2()
	
	Partly supported, missing separate lines
Tabview	
Simple Tabview	lv_example_tabview_1()
	
	Supported
Tabs on the left, styling and no scrolling	lv_example_tabview_2()

	
	Supported
Textarea	
Simple Text area	lv_example_textarea_1()
	
	Supported
Text area with password field	lv_example_textarea_2()
	
	Supported
Text auto-formatting	lv_example_textarea_3()

	
	Supported
Tileview	
Tileview with content	lv_example_tileview_1()
	
	Supported
Window	
Simple window	lv_example_win_1()
	
	Supported

Summary:

Unsupported cases:

1. Rotation is solely applicable to images and does not extend to other objects like buttons or images with an outline.
2. The functionality of layer is not available.

For cases with partial support, the following issues may be addressed in a future release:

1. In the current version, shadows appear to function only for a single object. If multiple objects are present, the shadows do not display correctly. – [fixed in 1.1](#)
2. Scroll bars are observed more frequently in EVE's settings, prompting the need for further investigation. – [fixed in 1.1](#)
3. There exists a layout problem wherein certain objects extend beyond the outer box boundaries. – [fixed in 1.1](#)
4. The lines separating two lines of text are not visible. – [fixed in 1.1](#)
